

15/25/28kV DT Series Grounding Cap

Product Data Sheet

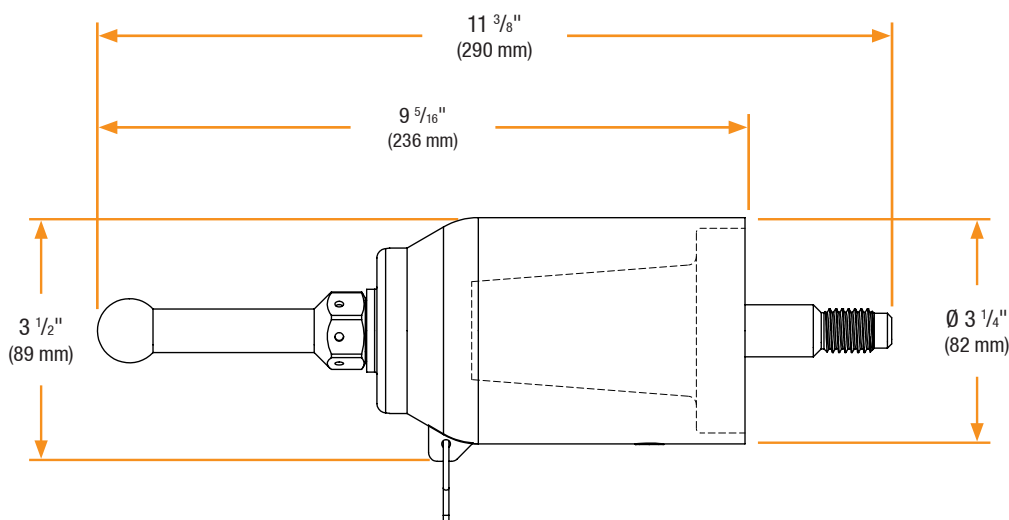

The Richards DT Grounding Cap (DTGC) is a grounding device specifically designed to provide a high fault current ground connection in conjunction with the Richards DT Plug. The cap is also available as a set of three in a durable carrying case.

Features

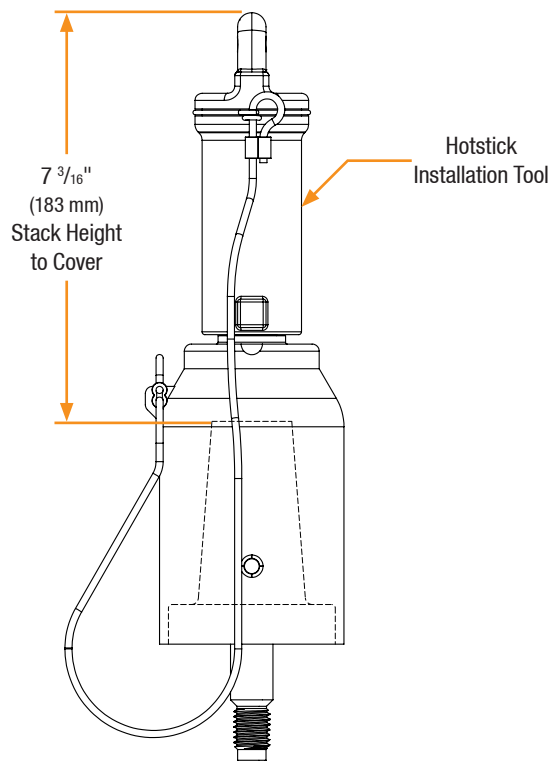

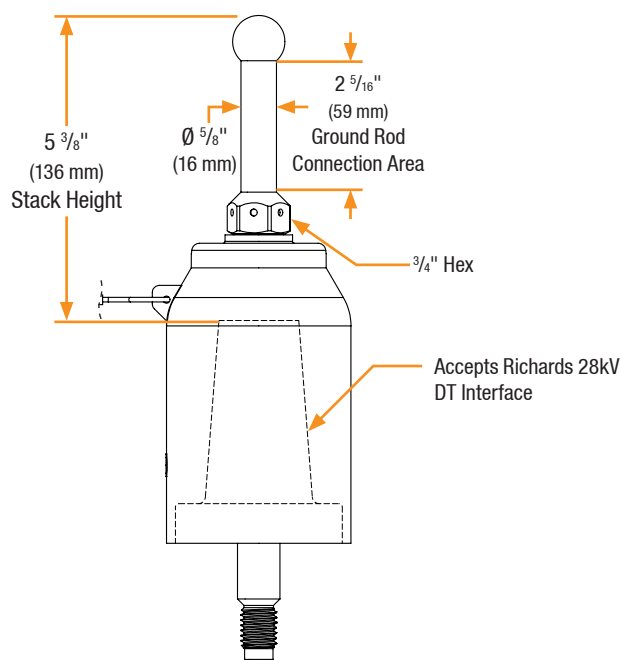

- Designed as a system for use with the Richards DT Plug
- Increased operational efficiency for grounding and safety procedures
- Increased short time current rating from 10kA (with Loadbreak) to 25kA
- Hotstick Operable

Basic Dimensions

15/25/28kV DT Series Grounding Cap

Installation

15/25/28kV DTGC installation is covered by: **II-DTGC**

Product Ratings

Short-Time Current Ratings

25kA, 10c. and 10kA, 3s. 

The 15/25/28kV DTGC is qualified to the following industry standards:

- IEEE Std 386: For Separable Insulated Connector Systems
