

Multi-Hex Installation Tool

Product Data Sheet

The P620AT is an installation tool for use on Medium Voltage Cable Accessories 15kV through 35kV. Equipped with a dual $\frac{5}{16}$ " and $\frac{3}{8}$ " hex tip, the P620AT can be used to install a wide variety of accessories. The back of the P620AT features an eyelet which is engaged with a hotstick to operate the tool. Built into the tool is a torque limiter set to 20 ft-lbs for installations with that minimum torque.

The Multi-Hex Installation Tool is made of steel, plated for corrosion protection, and heat treated for additional hardness and durability. Common applications for this tool include installing Loadbreak Bushing Inserts and "G" Fastener R-800s.
